MONEY, STOCKS AND GRAIN The New York Bears Make Another Raid

and Cause Further Depression.

At Indianapolis Wheat Was Steady and Unchanged, and Corn and Oats Were Firmer

-Quotations on General Merchandise.

MONEY AND STOCKS.

A Heavy, Weak Market, the Result of Manip-

ulation by the Bears. At New York, Saturday, money on call was easy, with no loans; closing offered at 14 per cent.

Prime mercantile paper, 34 @5 per cent. Sterling exchange was quiet but steady at \$4.86 to for sixty-day bills and \$4.87% tor demand.

The total sales of stocks were 171,640 shares, including the following: Atchison, 3,730; Chicago Gas, 3,020; Delaware, Lackawanna & Western, 1,800; Erie, 3,700; Hocking Valley, 9,300; Louisville & Nashville, 4,400; Missouri Pacific, 5,215; North American. 3,188; Northern, Pacific, preferred, 18,000; New England, 7,550; Reading, 16,062; St. Paul, 6,870; St. Paul & Omaha, 3,825; Union Pacific, 24,175; Wheeling & Lake

The stock market was heavy to weak in all of its departments without apparent adequate cause, and while there was a steady pressure of long stock in Union Pacitic, Northern Pacific preferred, and some of the granger roads, the principal agent in the depression was undoubtedly a renewal of bear raids without support in anything but a few specialties. Union Pacific and Northern Pacific preferred were to-day sold down to the lowest points in years. Missouri Pacific was another weak point as well as Tennessee Coal, but the great majority of the list moved off very slowly and final losses are of importance in only a few cases. The natural upward tendency of prices was demonstrated in the early dealings. The market, however, closed heavy to weak at or near the lowest Prices. Among the active stocks Union Pacific lost 1 and Missouri Pacific 1 per

Railroad bonds were comparatively quiet and as a rule showed the usual slight changes only. Final changes are generally slight gains, but while C., C., C. & St. L. consols rose 2. to 134, Beach Creek firsts lost 1, at 100 2. The total transactions were \$791,-

Government bonds were dull and steady, and State bonds were neglected. Closing

FRIENDS OF WHEAT ARE FEW

Heavy Traders for the Nonce Are Transferring Deals to the Corn Pit.

Sensational Reports from All Parts of the Corn Belt to the Effect that This Year's Crop Is Getting in a Very Tight Place.

TRADING AT CHICAGO.

Corn May Go Up Like a Rocket in the Next CHICAGO, May 14.-With eyes glued on the barometer the grain-traders did business to-day. Many sections in North Dakota reported the weather greatly improved and wheat seeding very generally resumed. There was a growing feeling that the danger point in seeding had not yet been reached, and that if it can be finished in the next week or ten days there will be little cause for alarm. The spread between May and July to 1c was again a feature and perhaps an encouraging sign for the bulls. This evening, however, compared with last night was %c lower. May corn is up 4c, while July shows %c decline. Oats are down 4c, pork 10c, lard .074c, and ribs .05c. Unusual interest was shown in the corn pit, and that lively times are looked forward to is evident from its crowded appearance. Many of the wheat-traders have transferred the scene of the operations from wheat to corn. The market was very strong at the opening, eased off on free selling by local

shorts, but firmed up again on the continued bad weather reports received from among their forty-four country stations reported that on putting their shellers to work they found much of the cribbed stuff moldy and damp. Country correspondents of Board of Trade firms inundated the latter with messages deploring the poor pros-pects for getting the corn planted in any reasonable time to insure a crop. The local crowd was rather against the market, and the first break in the price to-day was due to their vigorous selling. The later break was due to the same cause, in addition to the later weakness of the wheat market. The opening was rather wild, 44% being paid for July, against 44 to last night.
Soon it was being offered at from 44c to
44 to. It declined to 43 to, sellers, before
reacting. It gradually recovered, and near
the mindle of the session was in good de-

by the reported clearing weather and the smaller export clearance for the week. A reaction of 12c followed, but sudden local sunshine melted away the gain and the market closed steady within 'sc of the

The state of the weather enabled the bulls to keep prices steady on oats, although there was no little liquidation of small lots. There was considerable buying of May and selling of July at prices that were the same for both months. A disposition by the longs to unload caused provisions to fall. Pork and ribs were more active than for some time. Heavy receipts of hogs and liberal estimated arrivals for the coming week, as well as the break in grain, helped the slump. Freights were steady, with a fair demand, and not a great deal of vessel room offered. Charters to Buffalo were on he basis of 20 for wheat and 13 c for corn, The estimated receipts for Monday are cars wheat, 195 cars corn, 190 cars oats and 33,000 hogs. The estimated receipts of hogs for the entire week are 160,000. The leading futures ranged as follows

Tobacco. LOUISVILLE, Ky., May 14.—It has been a very satisfactory week for the leaf tobacco trade. The offerings have been fairly large and have been generally of good quality, embracing a considerable percentage of very desirable bur-leys. Fine bright hogsheads have been rather numerous, and many sales have been in excess of \$20. Bright lugs and trash have also been freely taken. Low grade burieys have shown a very firm front. The manufacturers are buying them freely, and in addition the regie buyers have recently been handling considerable quanti-ties of that character of tobacco. Common, medium and nondescript burleys remain decidedly irregular. The quantity on the market is very large.

A bulletin has been issued on the culture of the cantaloupe by the Alabama experi-ment station, from which we quote the following cultural directions: "Unlike the waterinelon the cantaloupe is most productive upon fertilized soil. While watermelon grows to perfection only upon soils containing a large percentage of sand, the cantaloupe will produce well upon any character of soil which is fertile and in good condition. Unlike the watermelon, it will thrive and produce best when planted thickly. In-stead of planting in hills six feet spart, plant in rows four feet apart and two feet in the rows. Cultivate shallow in advance of the growth of the vine, which should be distributed as little as practicwell to replant between the hills ten days after the first seed are planted. If the first come the replanted may be chopped out.
If the first are killed, the replants replace
them promptly. 3. Cultivate easly, frequently and shallow.

Deep cultivation so mutilates the roots as to prevent fruitfulness. Watermelens bear upon the main stem of the vine, cantaloupes upon the lateral. The best quality usually accompanies thorough netting and | riety of green fiesh. Therough netting and green fiesh. Therough netting enables the melon to withstand the effects of the sun and escape "sun scald," to which all-smooth surfaced varieties are subject more or less. Varieties having yellow fiesh are often sweet but invariably deficient in flavor. High flavor usually accompanies more or less coarseness of texture. Cantaloupes should not be allowed to ripen fully upon the vines. For shipment they should be plucked, with stem attached, just long enough before ripening to reach their destination before becoming mellow, but not green enough to cause wilting. For home use pluck when the steam readily separates from the melon under gentle pressure, and store in a cool place to mellow. If plucked at the proper stage of ripeness the desirable state of mellowness will be reached in twenty-four hours. Both watermelons and cantaloupes for home consumption should be plucked early in the morning, while freshened by the dew and the air of the night.

Patent Cattle Foods.

Pittsburg Post. Of all the frauds sought to be practiced apon the farmer none probably are more glaring than the concentrated stock foods, as put on the market by many manufacturers. These compounds usually sell for 50 cents a package of three or four pounds, or \$1 for twelve pounds. They thus range in price from \$150 to \$250 per ton. They put forth the claim that they are "not a medi-

cine. but a concentrated food."

A New England experiment station has done a good work in analyzing several of these compounds, and in every case their feeding value ranged from that of wheat middlings to that of cotton-seed meal. One was not as good as middlings, but it contained about 2 per cent. of common salt and was scented with fenugreek. This bran sold at only \$120 a ton. Another brand showed a trace of sulphuric acid and nearly 5 per cent. of common sait, and it sold at \$338 a ton-a fair advance over

cost of common salt, certainly. The oder of fenugreek was perceptible in all "foods" examined. All were glaring frauds in that the food value of the best one was not over \$25 a ton, and the sulphur, salt, etc., car be bought for a few cents a pound. On whom do these sharks live? Not on Post readers, I trust. Will the day never come when the city sharpers will learn that farmers are no longer their easy prey! The trouble is that too many do no read, and thus learn of the exposures constantly being made.

To make excellent whitewash slake lime to the proper consistency for application, into which, while hot, mix a starch made from half a pound of tionr, or two ounces

THE MANAGEMENT

DAILY, SUNDAY AND WEEKLY.

The Journal is first of all a newspaper. Its primary object is to pub lish the news, and to secure this it spares no pains or expense. Besides the service of two great news agencies, which cover foreign countries as well as the entire United States, it has a corps of Special Correspondents, who give attention to those events and occurrences that are likely to be of particular interest to the Indiana public. Its Washington bureau was established for the purpose of looking after matters in which the State and its people are concerned, and is under the management of an Indiana man well acquainted with the local business and political issues. It has a correspondent in every town of importance in the State, and is constantly increasing its facilities for obtaining information from every quarter. Its staff of city reporters is large, and its local departments are unexcelled. As a newspaper it is far better equipped than any other in the State, and welcomes comparison with its contemporaries in any and all of its departments. With all it endeavors to be accurate and trustworthy, printing the news, whatever it may be, without personal or parti-

But while the Journal is non-partisan as to news, it is a Republican paper, and sets forth Republican principles. It is important that the people shall read the truth about these principles, and it was with the one ject of putting everybody in the way of doing so that the price of the

DAILY JOURNAL

15 CENTS A WEEK.

No other method of securing a Republican victory at the polls is so certain as the circulation of Republican papers among voters. Since the reduction in price thousands of subscriptions have poured in from all parts of the State, showing that a need was supplied. In order to have the proper influence and effect upon voters seeking for trustworthy information the Journal should go into their hands at once, and not next spring or summer. Clubs are being formed and agencies established wherever daily mails reach and as rapidly as traveling agents can visit the places, but Republicans in each and every locality cannot do their party greater service than to interest themselves in circulating the Journal.

able. The secret of success rests in: 1. Thorough preparation and fertilization of the soil. 2. Planting as early as the season the soil. 2. Planting as early as the season will allow. To secure an early stand it is:

Is a paper that gives more attention to miscellaneous literature than the other editions, and contains in its sixteen, and often twenty, pages a va

READING MATTER CHOICE

That satisfies the most exacting taste.

Reduced rates to clubs.

The same reasons that call for the immediate extension of the daily circulation apply to the weekly. This is carefully edited, with a special view to the wants of Indiana readers, both in its general and political news. Its subscription price, \$1, with reduction to clubs, places it within the reach of all, and no campaign contribution can be so effective as when spent in furnishing this paper to readers who need Republican
